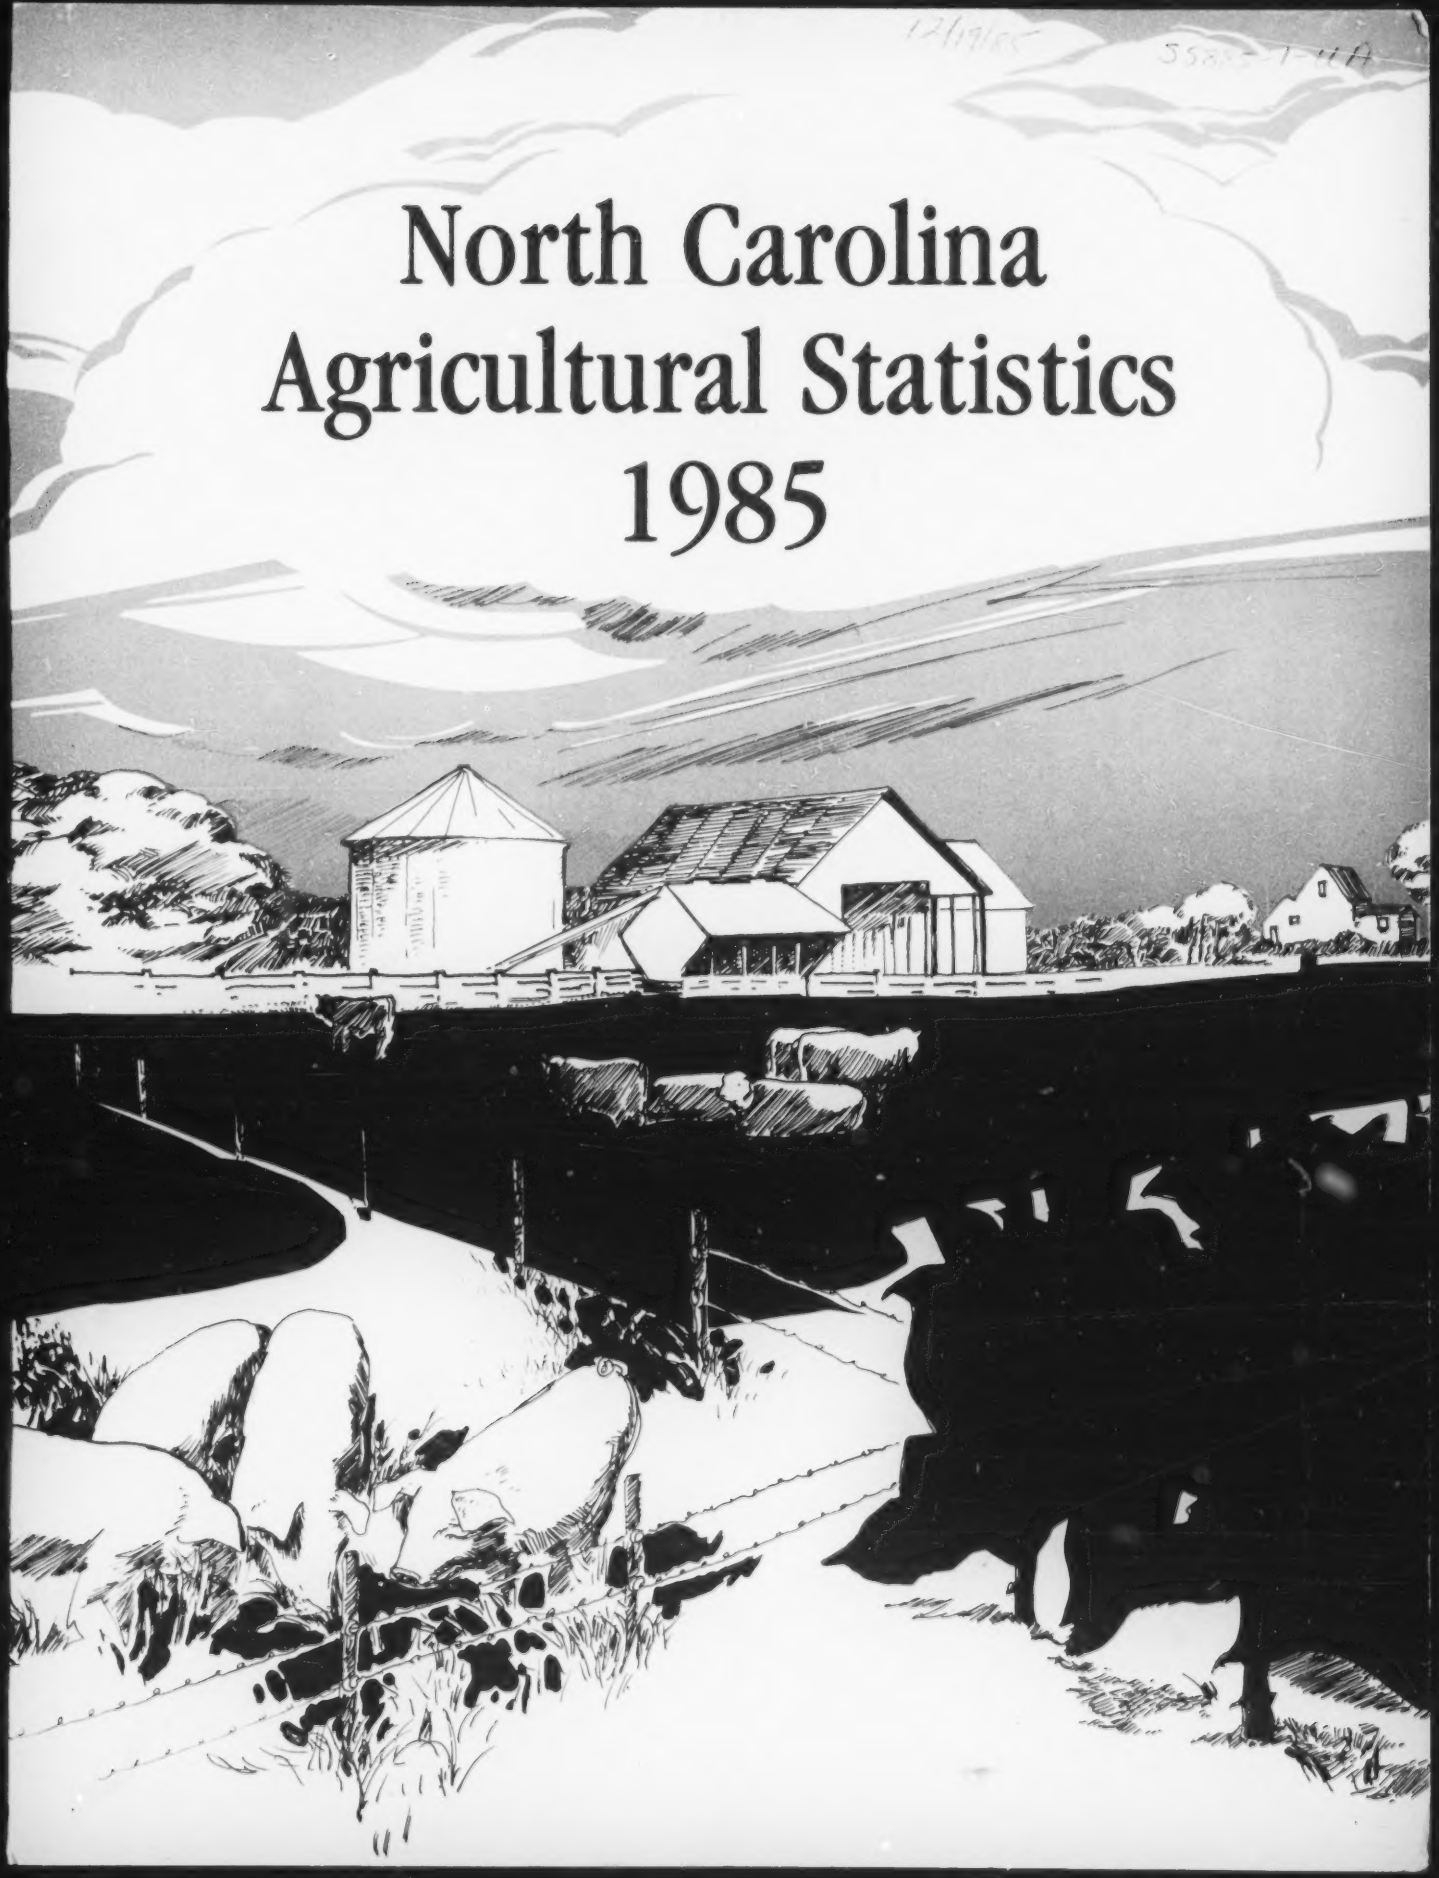
North Carolina Agricultural Statistics 1985



Office Of

THE COMMISSIONER OF AGRICULTURE

Raleigh, North Carolina

Agriculture is going through some tough times. Prices are down, cost of production is up, our National export program is floundering and our tobacco program is in trouble. Well, being the optimist I am, I say let's face our problems squarely and we'll survive. North Carolina farmers have experienced adversity before and are stronger for it. We've got some decent crop prospects and I'm anticipating a good 1985.

As you probably are aware, I crisscross the State many times during the year. On one of these trips, Jim Olson, Statistician on my staff, accompanied me as we inspected crops. The accompanying picture shows us in a tobacco field in Johnston County. Quality of this crop is good this year in most areas.

Use this book wisely--it contains the best data we can put together. Marketing decisions can better be made because of these statistics on output, costs, etc.

Thank you for reporting. Without the voluntary assistance from the thousands of farmers and agri-businesses who respond by mail, telephone or personal enumeration, we couldn't compile the information found in this book. My sincere appreciation to each and every one of you.

Sincerely,

James A. Graham

October 1985

Dear Data Users:

Have you ever tried to figure out what your mission is? The dictionary defines mission as "the business with which a person or persons is charged". We in the public sector need to re-examine our mission periodically to assure that we are fulfilling our responsibilities. When I look at the Crop and Livestock Reporting Service, our mission is to provide the most accurate, unbiased figures on domestic agricultural output that is possible with the resources made available. This we strive to do in order to assist the farmers here in North Carolina to make sound business decisions relative to planting, marketing, etc. Without a good measure of supply, the market place would be chaotic. We have enough problems in today's agriculture with high production costs, troublesome exports, uncertainty over government programs, etc. Good supply estimates help stabilize conditions, although other factors such as international trade conditions, the strong dollar, oversupply of certain commodities, etc. all contribute to prices actually received. My only point is that among the variables considered we attempt to provide one good sound component in the form of a supply estimate that can be relied upon.

Your voluntary assistance by providing the raw data necessary to make these estimates is appreciated. If we can be of further service, don't hesitate to let us know. We are here to serve North Carolina agriculture, and that is how I view our mission.

Sincerely,

James L. Olson

James L. Olson
Statistician In Charge

STATISTICAL REPORTS PROGRAM

NORTH CAROLINA AGRICULTURAL STATISTICS brings together the current and historic statistics concerning agriculture in the State. Where possible, types of information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service rendered to farmers and others in the State by the Statistical Reporting Service of the U. S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture.

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. Thus, in 1919 the N. C. Department of Agriculture entered into a cooperative agreement with the U. S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Crop and Livestock Reporting Service Division of the North Carolina Department of Agriculture.

The North Carolina Crop and Livestock Reporting Service publishes official statistics on crops, livestock, prices, and various other agricultural items. A list of the most important reports and the approximate dates of release is shown in the table below. Those reports marked with an (*) are issued separately. All others are included in the semi-monthly release entitled "Farm Report". There is a nominal charge for these reports, which are available by writing to:

Agricultural Statistician

TYPE OF REPORTS	FREQUENCY OF REPORT	APPROXIMATE DATE AVAILABLE
I. CROP REPORTS		
1. Intentions to plant	Annually	Feb. 18
2. Production of Field	Monthly	10-12th
Crops, Fruits & Vegetables	(In Season)	
3. Grain Stocks (All Positions	Quarterly	25th of Jan., Apr., Jun., Sept., Oct.
4. Annual Crop Summaries - Small Grains	Annually	December 20
Other Field Crops	Annually	January 15
II. WEATHER-CROPS REPORTS	Weekly*	Monday - 3:00 P.M.
III. LIVESTOCK REPORTS		
1. Cattle & Milk Cow Inventory, Jan. 1	Annually	January 30
2. Calf Crop	Annually	January 30
3. Pig Crop & Hog Inventory	Quarterly	20th of Mar., Jun., Sept., Dec.
4. Commercial Slaughter	Monthly	22nd
5. Meat Animals - Farm Production,	Annually	April 1
Disposition & Income	Annually	April 1
IV. DAIRY REPORTS		
1. Cows Milked & Milk Production	Monthly	Mid-Month
2. N. C. Dairy Report	Semi-Annually*	Mar. 1, Sept. 1
3. Milk Production & Disposition	Annually	May 24
V. POULTRY REPORTS		
1. Poultry Inventory Dec. 1	Annually	January 30
2. Eggs, Chickens, Turkeys & Hatchery:	Monthly	22nd
3. Broilers Placed, Eggs Set and Hatched	Weekly*	Wednesday-P.M.
4. Turkeys Raised	Twice Per Year	Aug. 20, Jan. 10
5. Turkey Breeder Hens	Twice Per year	Sept. 20, Jan. 10
6. Poultry Production, Disposition, & Income	Annually	April 8
VI. PRICE REPORTS		
1. Prices Received By Farmers	Monthly	30th
2. Prices Paid By Farmers	Monthly	30th

1984 Marked By Spring Tornadoes and Fall Hurricane

The 1983-84 winter experienced colder than average temperatures until late February when they rose well above normal. The false start of springtime was followed by devastating tornadoes while soil moisture remained surplus throughout the spring months. Nearly all of the spring plantings continued behind schedule finishing up by mid to late June. Planting of flue-cured tobacco, however, was ahead of schedule. The 1984 season began as a "carbon copy" of 1983 with more than adequate rainfall.

Summertime came early in the Tar Heel State, where above average temperatures and plenty of sunshine were ideal for small grain harvest and development of early planted crops. The dry spell lasted only through June, which made record high yields and production possible for several crops in 1984. It was an excellent year for the previously devastated fruit crops as well. Scattered showers throughout the month of August were most beneficial. Cooler, drier weather followed which produced ideal harvesting conditions. Expectations for all crop yields were up.

Farmers couldn't get their crop out of the ground fast enough during September in order to avoid Hurricane Diana's wrath. The most damage occurred in the southeastern region of the State, flattening cornfields, tobacco, soybeans, sweet potatoes and peanuts. Temperatures remained below normal and the rest of the State remained dry. Most crops, however, remained in mostly good condition. Harvesting activities continued behind schedule due to late plantings. Most crops were out of the ground by November's end.

Warm, sunny skies were welcomed during harvest. Unpredictable highs and lows brought the Tar Heel State through the holidays. During the final week of November, temperatures were 8-10 degrees below normal followed by a day in the 80's. Wintry conditions were short-lived in December with Asheville setting 12 record high temperatures. The warm, sunny weather allowed farmers to finish up soybean and cotton harvest and fall plowing.

TOTAL FERTILIZER CONSUMPTION UP 18%

Fertilizer consumption in North Carolina during the year ended June 30, 1984 totaled 1,746,282 tons, up 18% from the 1982-83 total. Mixed fertilizer and fertilizer materials were up 14% and 26%, respectively, from last year. Mixed fertilizer accounted for 63% of the total consumption and direct application materials accounted for the remaining 37%.

The most widely applied mixed fertilizers were 10-10-10, 5-10-30 and 3-9-9, respectively. These three fertilizers accounted for 26% of the total fertilizer mixtures. Nitrogen solutions, muriate of potash and ammonium nitrate were the three most popular fertilizer materials. This group of materials accounted for 82% of the total materials. Nitrogen solutions alone accounted for 68% of the total materials.

Fertilizer consumption represents all commercial fertilizer tonnage sold or shipped for farm and non-farm use as fertilizer. Materials used in the manufacture of registered mixes or for use in other fertilizer are excluded.

NOTE: Data show tons received in each county by retailers and consumers from manufacturers. Tons credited to a county do not necessarily equal the amount it actually consumed. Data exclude lime and landplaster.

Flue-Cured Poundage Up 8%

Production of flue-cured tobacco in North Carolina in 1984 totaled 569.1 million pounds, up 8% from the 1983 production of 524.9 million pounds. Harvested area was 262,000 acres, down 2% from the 1983 acreage and the lowest level since record keeping started in 1919. The yield per acre averaged 2,172 pounds, up significantly from the 1983 average yield of 1966 pounds.

The value of the flue-cured crop reached $1.028 billion. This is a 10% increase from the 1983 value of production at $934 million. Farmers received an average of $180.70 per hundred pounds, up slightly from $178.00 per hundred pounds in 1983.

Corn Crop Nearly Doubled

North Carolina corn production for 1984 was 145.8 million bushels, up 90% from the 1983 production of 76.8 million bushels. Acres harvested at 1,620,000 were up 27% from the 1983 PIK Program reduced acreage of 1,280,000. The yield per acre of 90 bushels was up significantly from the 1983 drought reduced average yield of 60 bushels and the second highest of record.

The value of the crop totaled $415.5 million, up from the 1983 figure of $282 million. The season average price was $2.85 per bushel, down $.82 from the 1983 price.

Soybeans Up Sharply

The soybean crop in North Carolina during 1984 totaled 46.5 million bushels, up 41% from the 1983 production. The acres harvested in 1984 was 1.79 million acres, up 8% from a year earlier. Yield per acre averaged 26 bushels, up 6 bushels from the 1983 figure and equal to the record high yield in 1969.

The value of production is placed at $276.9 million, 6% more than the 1983 value of $260 million. Farmers received a season average price of $5.95 per bushel, down $1.94 from that of 1983.

Burley Tobacco Down

The 1984 Burley Crop in North Carolina totaled 21 million pounds, down 5% from the previous year's production of 22 million pounds. Harvested acreage was set at 9,600 acres, down 10% from 1983. The average yield per acre was 2,185 pounds, up 6% from the yield in 1983.

The crop was valued at $38.7 million, 2% less than the 1983 crop. The season average price was $184.40 per hundred pounds compared with $178.90 for the previous season.

Peanuts Up 41%

The peanut crop in North Carolina for 1984 totaled 449.5 million pounds, 41% more than the 1983 crop. Acres harvested were 155,000, up 5% from 1983. The yield averaged 2,900 pounds per acre, 735 pounds above the 1983 yield.

The value of the 1984 crop totaled $121.8 million, up 51% from the 1983 crop. The season average price was 27.1 cents per pound, up from 25.3 cents per pound in 1983.

Sweet Potatoes Up

Yam production in the Tar Heel State is estimated at 5.1 million cwt., 16% more than the 1983 production of 4.4 million cwt. The yield per acre averaged 135 cwt., 15 cwt. more than the previous year. Harvested acreage was 38,000, up 1,000 acres from 1983.

The season average price was $15.40 per cwt. down $.30 from 1983. Value of production at $79 million was 13% above the previous year.

Apple Crop Down 13%

Commercial apple production in North Carolina totaled 360 million pounds for 1984, 13% below the record high 1983 production of 415 million pounds. The season average price was 6.6 cents per pound and the value of production was $23.9 million.

Peach Crop Recovery

Total production of peaches in North Carolina in 1984 is estimated at 43 million pounds, up sharply from the 1983 freeze reduced crop of 12 million pounds. Utilized production in 1984 totaled 35 million pounds. About 3 million pounds were harvested and not sold and another 5 million pounds were left on the trees because of natural or economic reasons.The value of utilized production totaled $4.8 million which calculates to a season average price of 13.7 cents per pound.

Cotton Crop Up Sharply

Cotton growers in North Carolina produced 120,000 bales in 1984, nearly triple the 1983 production of 43,000 bales. This increase was attributed to a greater yield per acre and more harvested acres than a year earlier. The yield in 1984 averaged 600 pounds per acre, up 71% and the harvested area totaled 96,000 acres, 63% above the 1983 crop.

Cotton lint was valued at $36.3 million, up 149% from 1983. The season average price at $.630 per pound was down 11% from the previous year. The value of cottonseed was $3.9 million in 1984 with a season average price of $93.00 per ton.

Cash Receipts Rise

Cash receipts from livestock, dairy, and poultry products totaled $1.9 billion in 1984, up 15% from 1983. Large gains were recorded for broilers, turkeys, and eggs while hogs increased slightly and milk, cattle and sheep receipts dropped. All poultry products combined increased the most and accounted for $1,173 million while broilers alone amounted to $603 million or 31% of the total livestock and poultry cash receipts. Receipts from hogs accounted for 20% of the total and, at $381 million, was up 1% from the previous year. Wholesale milk cash receipts dropped 3% from 1983 to $239 million. Cash receipts from turkeys sold totaled $286 million, 38% more than 1983. Eggs produced during 1984 brought in $239 million, 40% above the previous year. Receipts from cattle and calves decreased to $91 million, down 15% from 1983.

Broiler Production Record High

A 2% increase in the number of broilers produced coupled with heavier slaughter weights for Tar Heel birds accounted for a record high 1.9 billion pounds of broilers in 1984, 4% more than last year. North Carolina held on to its number four ranking in broiler production with a total of 428 million birds produced.

The average price of 32.0 cents per pound for broilers rose 19% and yielded a gross income of $603 million for the State, another record high and 24% above last year. Income from broilers is the largest contributor to cash receipts for the livestock and poultry commodity group making up about 31% of the income for this group.

Hogs Remain #7

North Carolina continues its number seven national ranking in hog production with a December 1, 1984, inventory of 2.3 million head, an annual decrease of 2%. Farrowings were down 4% to 475,000 head in 1984 for an average of 7.85 pigs per litter, continuing the gradual increase in pigs saved per farrowing. A crop of 3,729,000 pigs was produced in the State during the year, 133,000 or 3% less than the preceding year.

Hog marketings at 3,622,000 head increased 4% during 1984. Although the average price for hogs dropped 2% to $45.60 per cwt., the increase in marketings resulted in a 1% increase in cash receipts to a record high $381 million for the State. The value of home consumption at $6.8 million was down 19% from a year earlier.

Milk Production Drops

Milk production in North Carolina during 1984 dropped to 1.6 billion pounds, off 4% from the 1983 record pace. The average number of milk cows at 130,000 head was down 2% from the previous year while milk output per cow, at 12,685 pounds, was down 180 pounds.

Cash receipts from sales of milk and cream dropped 3% from last year's record high and totaled $239 million. The total value of milk produced was down 2% to $247 million. Fluid milk prices rose 1% from 1983 to $15.00 cwt.

Turkeys "Strut"

North Carolina retained the number one ranking in turkey production during 1984. A record high 30.4 million turkeys were produced in North Carolina during the year, up 4% from the previous year's record high number. The 4% increase in meat production to 550 million pounds, combined with a large increase in price per pound, caused cash receipts to farmers to rise to a record high $286 million, 38% above 1983.

Egg Receipts Jump

Cash receipts from sales of eggs during 1984 at $239 million was up 40% from 1983. The average price rose sharply to 88.7 cents per dozen caused by higher consumer demand in early 1985 in response to the avian flu scare. The higher per dozen price received and a 3% increase in eggs produced resulted in record high cash receipts. The State jumped from its number 8 national ranking in egg cash receipts to number 5, racing past Alabama, Arkansas, and Texas.

Cattle Marketings Drop

Cash receipts from cattle and calves in the State totaled $91 million, off 15% from 1983. A 9% drop in the number of cattle and calves marketed and a $1.60 per cwt. average price drop for calves caused the decline. The value of home consumption of cattle and calves rose 1% in 1984 to $12.7 million.

The Tar Heel inventory of cattle and calves as of January 1, 1985 was 1,175,000 head, up 5% from January 1, 1984. Calf marketings rose 1% to 162,000 head while the number of cattle marketed dropped 16% to 176,000 head. Calf births at 470,000 head rose 10,000 head from 1983.

Sheep Inventory Up Slightly

The number of sheep and lambs in North Carolina at 8,400 head as of January 1, 1985 was up 1% from a year earlier. The lamb crop was 6,500 head, unchanged from the previous year.

Marketings of sheep and lambs were 19% below 1983 resulting in a 7% decrease in cash receipts to $152,000.
